

Meet CBD+iso: Plant Therapy's New Line of CBD Products

CBD+iso includes three new specialized collections that combine CBD with isolates to help you deal with life's problems.

Twin Falls, ID - April 27, 2020 - Plant Therapy is excited to announce that they are expanding their current selection of CBD products. CBD+iso combines the Broad-Spectrum CBD we know and love with isolates to create the Quiet Mind, Rest Easy, and Intense Relief collections. Each collection is designed to target issues that many people encounter in their daily lives, whether it's stress, sleep, or pain. These collections offer a number of supplements and topicals in various strengths so that customers can easily find the product that works for them.

CBD+iso Quiet Mind Collection combines broad-spectrum CBD with CBG Isolate. These natural plant-derived cannabinoids are formulated to provide targeted benefits for life's stressful moments. Cannabidiol (CBD) and Cannabigerol (CBG) are non-psychoactive cannabinoids that help supplement and support your body's naturally occurring endocannabinoids levels, allowing your endocannabinoid system (eCS) to function properly. Both CBD and CBG support the eCS, which helps promote overall health and wellbeing and may also help reduce feelings of stress. The Quiet Mind Collection supports a more relaxed and tranquil state of mind when you're dealing with stressful situations. It also helps foster a calm and balanced mood.*

CBD+iso Rest Easy Collection combines broad-spectrum CBD with CBN Isolate. These natural plant-derived cannabinoids are formulated to provide targeted benefits for life's sleep issues. Cannabidiol (CBD) and Cannabinol (CBN) are non-intoxicating cannabinoids that help supplement and support your body's naturally occurring endocannabinoids levels, allowing your endocannabinoid system (eCS) to function properly. Both CBD and CBN support the eCS, which helps promote overall health and wellbeing and may also help when experiencing occasional sleep issues or restlessness. Rest Easy Collection helps promote a well-rested night of sleep, allowing you to fall asleep, stay asleep and wake up feeling energized without a sluggish feeling.*

CBD+iso Intense Relief Collection combines broad-spectrum CBD with CBC Isolate. These natural plant-derived cannabinoids are formulated to provide targeted benefits for life's aches and pains. Cannabidiol (CBD) and Cannabichromene (CBC) are non-psychoactive cannabinoids that help supplement and support your body's naturally occurring endocannabinoids levels, allowing your endocannabinoid system (eCS) to function properly. Both CBD and CBC support the eCS, which helps promote overall health and wellbeing and may also help when experiencing inflammation or discomfort.*

Plant Therapy rigorously tests every batch of their CBD. Reputable third-party laboratories are brought on to run a High-Performance Liquid Chromatography (HPLC) test, measuring the potency and levels of cannabinoids in each batch of CBD and ensuring that their broad-spectrum CBD is completely THC-free. Gas Chromatography-Mass Spectrometry (GC-MS) tests, like those currently offered for their essential oils, are also run to measure valuable terpene levels. Additionally, during the post-manufacturing process, Plant Therapy CBD is tested for the top 40 pesticides, a microbial test is done to confirm the batch is free of all bacteria, and each batch is tested for heavy metals to ensure all CBD sold by Plant Therapy is free of contaminants. Lot codes on the bottles will link directly to the test data, continuing Plant Therapy's commitment to transparency with their customers.

"Our goal with the CBD+*iso* collections was to create solution-based products that utilize broad-spectrum CBD as well as additional isolates to make the most of the therapeutic effect. The addition of the targeted isolates helps to support the individual goals of each line including sleep support, easing pain, and stress relief," says Emilee Hughes, Product Manager of CBD+*iso*.

Plant Therapy sources the highest-quality hemp in the United States from reputable, ethical growers, before using pressurized carbon dioxide at low temperatures to extract the CBD with up to a 90 percent extraction efficiency. The resulting extract is a highly concentrated, pure oil extract that contains no synthetics or contaminants, and is not addictive. CBD is available for purchase online at www.planttherapy.com/CBD. A full list of frequently asked questions about CBD can be found at <https://www.planttherapy.com/CBD/FAQ>. Plant Therapy's full line of essential oils, home, and personal care products are available through the company website, www.planttherapy.com, and at online retailers including Amazon.com.
